(1)

From the Secretary to the Chief Commissioner of Mysore, Public Works Department, To the Commissioners of Divisions, Circular No. 101, dated 25th June 1875.

It having been suggested that there should be a general system of pruning avenue trees along public roads, I have the honor, by desire of the Acting Chief Commissioner, to request you to be good enough to state what restrictions you would impose on lopping avenues, and to submit your opinion as to whether it would not be safer in the hands of the Forest Department.

From the Commissioner, Ashtagram Division, To the Secretary to the Chief Commissioner, Public Works Department, No.288, P.W.D.77, dated Nanjangud, 18th July 1875.

In reply to your Circular No.101 of the 25th ultimo, regarding lopping avenues, I have the honor to forward copies of replies from the Deputy Commissioners on the subject as per margin, and to state that if the Forest Department can undertake the duty, I should recommend their being entrusted with it. Written instructions are liable to be mistaken, but the Forest Department could either teach some men a proper system of thinning or pruning or point out what should be done.

From Mysore, 9th July 1875.
do Hassan, 7th do

From the Deputy Commissioner, Mysore District, To the Commission

Ashtagram Division, No. 600, dated Mysore, 8th July 1875.

In reply to your Circular docket No. 192 of the 30th ultimo, inquiring what restrictions can be imposed on the lopping of avenue trees, I have the honor to submit that the number of roads in this District is numerous and that if the duty of lopping avenue trees be left to the Forest Department, who have a limited establishment mostly residing near jungles at a distance, much delay must necessarily take place. It would be better therefore to assign the duty to Amildars, giving them a few simple instructions for their guidance, which might be drawn up by the Conservator of Forests.

From the Offg. Deputy Commissioner, Hassan District, To the Commissioner, Ashtagram Division, No. 579, dated Hassan, 7th July 1875.

His Circular No. 192, dated 30th ultimo, forwarding for opinion copy of a letter from the Secretary, Department Public Works, on the subject of restrictions to be imposed on lopping avenues.

Has the honor to state in reply, that the undersigned sees no objection to the work being done by the Forest Department, as suggested in the above.

From the Commissioner, Nandidroog Division, To the Secretary to the Chief Commissioner of Mysore, Public Works Department, No. 126, dated Bangalore, 22nd July 1875.

In reply to your Circular No. 101 of the 25th ultimo, asking my opinion, as to whether it would not be safer to place the lopping of avenues in the hands of the Forest Department, I have the honor to inform you that the Deputy

Arboriculture in the
Province —

whitewash the points at which loppings should be made.

3. The Officiating Chief Commissioner observes that with the exercise of an ordinary amount of attention and care on the part of both District Officers and Executive Engineers in regard to their respective roads, there ought to be no difficulty in providing against such neglect of avenue trees as has been noticed in these papers. This neglect has been permitted in the earlier stages of the growth of the trees, and with regard to Colonel Sankey's remark that more than one plant has been allowed to grow up in one place, it is to be observed that pruning in such cases will require no ordinary care for the lopping of one of such trees would involve probably the destruction of the others, from decay of the interlaced roots

4. Mr. Dalyell observes that systematic inspection and trimming are requisite and that through the agency of the Local Fund Engineer (where such has been appointed) or the District Surveyor, the District Fund Committee have it in their power to require that these points should receive due attention.

5. The entertainment of a separate agency at a large aggregate cost does not seem to be called for, but the Officiating Chief Commissioner fully recognizes the necessity of employing competent persons to prune and supervise all young plantations whether in avenues or groves, and considers that this need should be kept in view by District Officers, in order that some steps may be taken in consultation with the Forest Conservator to train Taluk Mestries or other available persons for the work, and if necessary obtain the services of instructors temporarily for the purpose to such extent as the Local Funds of their Districts may admit of.

6. The Officiating Chief Commissioner is satisfied however that the

(5)

work should not be made over to the Forest Department, whose Officers have not such means of supervision as the Revenue Officers possess, and who would otherwise unfitted to carry it out in such a manner obviate the complaints of ryots who under existing arrangements in many cases have planted trees on promise of gathering the fruit and loppings.

7. In the case of Imperial lines under the immediate charge of the Public Works Department, the work of pruning and lopping must be carried out by those Officers with due regard to any private interests that may exist, such as are adverted to in the preceding para.

To

(S ed) Fredway Clarke,
Offg. Secretary.

Part B for

SUBJECT.

System of Roadside Arboriculture in the Province.

41.

W D 83—GPB—50,000—24-7-18

Commissioners are on opinion that unless the work be performed by skilful and experienced persons on proper rates of payment, it would be better to entrust the work to the Forest Department.

2. It would appear that a sum of Rs. 1000/- has been provided in the District Fund Budget for the current year on account of avenues at the rate of Rs. 500 for each District.

3. I think it would be better to hand this work over to the Forest Department; the subordinates of that Department ought to understand and know how to carry out such work judiciously and carefully; at any rate, there would probably be less chance of a recurrence of reckless lopping

From the Commissioner of the Nagar Division, To the Secretary to the Chief Commissioner of Mysore, Public Works Department, No. 210, dated Shimoga, 12th August 1875.

With reference to your Circular No. 107, dated 28th June last, on the subject of the management of avenue trees, I have the honor to inform you that the Deputy Commissioner, Kadur, is of opinion, that the duty of pruning avenue trees may be transferred to the Forest Department. The Deputy Commissioners of Shimoga and Chitaldroog think that, with the assistance of the Local Fund Engineer and guided by the simple and practical rules prescribed in the Chief Commissioner's General Circular No. 7 of the 9th January 1873, they can undertake the duty.

2. I do not advocate the work being entrusted to the Forest Department because I do not think they have the means of keeping the many miles of avenue trees under efficient supervision, and I believe that District Officers are in a position to do this, and that the responsibility falls naturally

much, and this maxim applies all the more strongly to lopping operations and both pruning and lopping may generally with advantage be spread over two or three years.

4. Operations regulating the growth of an avenue tree should be commenced at as an early a stage in the life of the young tree as possible, provided always that no tree should be even handled till it has established itself and is growing vigorously. Root growth should be well established, and when such growth is clearly established as shewn by the healthy look of the seedling, pruning operations may commence. No rule regarding age can be laid down, but it may well be that some trees may be two or three years old before they should be touched. Where cuttings have been put down, leaves should be removed with a sparing hand.

5. Avenue trees are not grown for the sake of timber. The first requisite is that they should provide a maximum of shade without impeding traffic. Another point must also be considered, and that is, that in Mysore ryots plant avenue trees on condition of having the produce. Provided therefore that the roadway is left clear, trees should not be encouraged to run up too high.

6. Pruning should not be carried on at any and every time of the year. The best time on the whole will be found to be at the close of the rains, as the wounds will bleed less.

7. The lower young side branches should then be pinched off, or if they should be too tough to allow of their being removed in that way, they should be cut clean off, with a sharp knife, and close to the stem and parallel to it.

8. Wherever two branches are growing out of the same place, one should invariably be removed if it is not necessary to remove both. Should any

particular branch be ~~developing~~ developing itself much faster than any other it should be cut back, if not altogether removed. Where a tree has two leading shoots one should be cut clean out.

9. Where avenue trees are older, and have formed hard woody branches, lopping must frequently be had recourse to, and this operation requires great care.

10. In lopping all branches should be cut in a line parallel to the axis of the tree, and as near to the stem as possible, taking care however that none of the bark of the stem itself is torn or injured in any way, and a large wound thus opened in the side of the tree. No projecting stumps should be left, and the cut must be a clean one.

11. In removing branches an incision should be made from below first, so as to prevent the bark being torn off the stem as will almost invariably happen when the cut is made entirely from above. When large branches have to be removed, they should first be shortened back, and the stump carefully cut off afterwards, not forgetting the incision from below.

12. Where two seedlings have been planted in one hole, and are still young, it is best to remove the smaller at once, more especially when the two trees are of one and the same kind. But where the trees have grown together for some years, they should be left, (unless one has greatly dwarfed the other) as the tree left to stand will almost surely be lopsided.

No.7903-General 181, dated Bangalore, 21st January 1876.

ORDER THEREON- The Officiating Chief Commissioner approves of the Rules for "Pruning and Lopping of Avenue Trees" submitted with the foregoin letter, and directs that they be communicated to the Commisioners of Divisio

...terally upon th...

Note by Chief Engineer, dated 19th August 1875.

Although there is a diversity of opinion in replies as to the propriety of entrusting the lopping of avenue trees to the Forest Department, the majority of opinion clearly inclines that way, and would probably be wholly so, if the Forest Department had sufficient means for executing the work.

This Certain van Someren says he has not at present, but I think such might be created by asking him to have a selected man in each District, specially trained under one of his Officers under whose orders he would always act, to be paid out of the allowance of Rs. 500 which stands entered for each District in the District Fund Budget for planting avenues.

So far as concerns actual planting, I think the Amildars as being on the spot, and using their influence with the ryots, can always do that better than a single man working in a whole District; but as regards lopping, I think there can be no question that a man specially trained, as I should propose, would alone be trusted for this particular work, as also possibly for generally bringing to notice the condition of trees along the lines travelled by him.

No. 5758-Genl. 197, dated Bangalore 15th October 1875.

ORDER APPROVED. The question discussed in the correspondence above noted relates to the mode in which and the particular Department by which the Road Overseers can be most efficiently maintained.

The existing orders on the subject of pruning and lopping avenue trees direct that the work should be done by the Revenue Officials, the aid of the officers of the Public Works Department being given in indicating by whi...

Proceedings of the Chief Commissioner of Mysore, General Department, 21st January 1876.

From the Conservator of Forests, Mysore and Coorg, To the officiati Secretary to the Chief Commissioner of Mysore, General Department, Revenue-Forests, No. 3875, dated Bangalore, 7th January 1876.

(2)

In connection with Chief Commissioner's Proceedings Circular No 5753-127 of the 15th October, para 5, I have the honor to submit a sho memo on "Pruning and lopping of avenue trees," which will I think be found of general use in training men who may be appointed to such work by the District Officers.

2. It is not possible to lay down any hard and fast rules, for climate and circumstances vary so greatly in different parts of Mysore should the Chief Commissioner approve of the memo I would get to sugges that it be translated into Kanarese and circulated to all Districts.

Pruning and Lopping of avenue trees.

1. Where trees can be grown close together, the less they are pruned or lopped the better. They will clear themselves and the removal of leaves by artificial means can very easily be overdone.

2. Owing however to the necessity that exists for planting avenue tr at a distance from each other, the trees are apt to throw out side branches too low down on their stems, as the presence of light and air all round them stimulates this action, and this must be checked so as enable the tree to get a clear stem and throw out branches, only at su a height as while affording shade to travellers shall not interfere wi the traffic.

3. It is better to err by pruning too little than by pruning too

such, and this remark applies all the more strongly to lopping operations and both pruning and lopping may generally with advantage be spread over two or three years.

5. Operations regulating the growth of an avenue tree should be commenced as an early a stage in the life of the young tree as possible, provided always that no tree should be over handled till it has established itself and is growing vigorously. Root growth should be well established, and when such growth is clearly established as shown by the healthy look of the seedling, pruning operations may commence. No rule regarding age can be laid down, but it may well be that some trees may be two or three years old before they should be touched. Where cuttings have been put down, leaves should be removed with a sharp knife.

6. Avenue trees are not grown for the sake of timber. The first requisite is that they should provide a maximum of shade without impeding traffic. Another point must also be considered, and that is, that in Western cycle track avenues there are conditions of having to produce. Provided therefore that the roadway is left clear, trees should not be encouraged to run up too high.

7. Pruning should not be carried on at any and every time of the year. The best time on the whole will be found to be at the close of the rains, as the woods will bleed less.

8. The lower young side branches should then be pinched off, or if they should be too much for the idea of their being removed in that way, they should be cut clean off, with a sharp knife, and close to the stem and parallel to it.

9. Where two branches are growing out of the same place, one should invariably be removed if it is not necessary to remove both. Should any

Chief Commissioner's Proceedings No. 818-38-Mis 69 of the 16th April 1880.

Endorsement by the Secretary, Department Public Works, dated 28th July 1880.

No. 3806-14-Mis. 369, dated Bangalore 2nd August 1880.

Order thereon.- In Proceedings No. 818-38-69, dated the 16th April 1880, avenue trees planted on the sides of roads were re-placed under the orders of the Revenue authorities as they are best fitted to deal with any private rights involved in the trees, and to arrange for their preservation and re-planting through the agency of the villagers. Matters relating to the planting and watering of the trees, the removal of dead trees and the disposal of the produce, will continue to be dealt with by the Revenue authorities; but as regards the lopping of the trees and the removal of any obstructions to the road, the Chief Commissioner considers that the Offices of the Public Works Department or others who may be in charge of the road are in a better position to carry them out than any other officer. They will therefore be responsible for these duties. They should of course bring to the notice of the Revenue Officers any matters requiring their attention in connection with the avenue trees, and the Chief Commissioner believes that by such co-operation on the part of the Officers of both Departments the proper planting and preservation of avenue trees will be ensured.

After a good deal of consideration of all that can be said fo and against a re-trasfer from the Public Works to the Revenue Department of the duty of lopping avenue trees, the Government is of opinion that the balance of advantage points to the advisibili of such a transfer, and accordingly order to Re-invest the Deput Commissioers and under them in Amildars the duty in questi In exercising they will be expected to use the utmost discretion and to restrict all lopping operations to the absolute require- ments of the Safety and convenience of traffic.

2. The loppings, minus the cost, should belong to the persons who

are entitled to the ~~usufruct~~ of the trees, and where no such persons exist, they should be sold and the proceeds credited to the Government.

READ :—

The following letters from the Deputy Commissioners of districts, submitting the reports called for in Official Memorandum No. 10962-9—R. 3615, dated 17th June 1897, in regard to the action taken by them for the protection of avenue trees :—

1. Letter No. 63, dated 9th July 1897, from the Deputy Commissioner of the Bangalore district, stating that the trees are cared for by the raiyats who planted them, and by the village servants, that planting operations are supervised by shekdars and patels and other taluk officials, and that division and jamabandi officers are enjoined systematically to inspect and report on their condition.

2. Letter No. 5167—1188, dated 30th June 1897, from the Deputy Commissioner, Kolar, stating that the avenue trees in his district are being looked after by the village servants under the direct supervision of the patels, shekdars and the beat policemen, and that the Amildars and Assistant Commissioners attend to the conservation of these trees and notice injuries done to them during their tours of inspection.

3. Letter No. 1906, dated 24th June 1897, from the Deputy Commissioner of Mysore, stating that the task of numbering the avenue trees with tar is laborious and costly, that parties unauthorizedly cutting the branches or injuring the trees will be criminally punished, and that the patels and other village officers will be held responsible for the due protection of the trees within their village limits.

4. Letter No. 1055, dated 19th June 1897, from the Deputy Commissioner, Tumkur, stating that the avenue trees are not wantonly destroyed on any account, the patel being held responsible for any damage done to them within the limits of his village, that the idea of numbering the avenue trees and recording in a register the extent of the private rights existing therein is good, and that an attempt may be made in this direction if the District Fund will bear the cost of numbering the trees.

5. Letter No. 326, dated 18th September 1897, from the Deputy Commissioner of the Hassan district, stating that orders have been issued to Amildars for the conservation and planting of new trees.

6. Letter No. 25, dated 12th July 1897, from the Deputy Commissioner, Kadur, reporting that the village officials are entrusted with the duty of looking after the avenue trees and of planting and preserving them, that the patels get vacancies filled up with the help of villagers, that inspections are made by Amildars and Jamabandi Officers, that the numbering of avenue trees is hardly useful, save for the purpose of identification, and that the measure would only entail needless expense to Government, and suggesting that the old as well as the young trees may be tarred at the surface root and trunk to a certain height to prevent white ants getting into and otherwise injuring them.

7. Letter No. 1371—1153, dated 25th June 1897, from the Deputy Commissioner, Shimoga, stating that the patels, shanbhogs, shekdars, Amildars, Assistanat Commissioners, and the Deputy Commissioner inspect avenue trees every now and then, punish those that do mischief to them and cause fresh plants to be put up in place of the dead trees.

8. Letter No. 64—60, dated 19th July 1897, from the Deputy Commissioner of the Chitaldrug district, stating that wanton mischief to avenue trees is a rare occurrence, in that district, where, therefore, the proposed precaution of numbering them with tar is unnecessary, and that the village and taluk officials are quite alive to their responsibility of carefully looking after the safety of the trees.

No. 7537-44—L. F. 345-96, DATED BANGALORE, 5TH JANUARY 1898.

ORDER THEREON.—Recorded with the observation that the proper conservation of avenue trees is a matter to which the Government attach the highest importance, and that it is hoped that all possible attention will be paid to it by the District Officers and their subordinates as well as by Local Fund Boards.

C. SREENIVASIENGAR,
Secy. to Govt., Gen. & Rev. Depts.

In Pro: No 3[illegible] - 3.12 Dated 2.12.[illegible], I was asked to carry out certain improvements in the Cauvery Avenue from the Fort to the Race Course.

In my letter, the Engr. Engineer stated in my report that an annual sum he had suggested in the Estimate of Bangalore, Kolar and Chikballapur, for avenues & avenue trees was being spent without any definite object, and he would bring this to the Hon. Dewan having explained the duty of Engineers, superior as in Pro. quoted above -

In Chamarajpet, I called upon all the Engrs to report whether or not

the

The Copying operations ... regarding extension of the Rev. Dept since cessation of Post Pay of 1892 - My visit to Vienna from there to Paris (under Order No 12 of 30 October) (Private) Many visits made, Vienna Dispatch, & the proceedings of the meeting, which in other Dispatches, it has not been appropriate here, or has been briefly done, & the Report of the Executive - Vienna - Many visits to the Post Office for Copies of the Re-Arrangements of the Rev. Dept & to the P.O. Dept

IV. On the Vienna Convention, I only received Copies of the 13 Prop/97, on this subject. I consent to the Vienna Arrangement approved.

V. The Arrangement having had a first Meeting for more than 7 years, and especially finished, I only recommend a Convention to the Vienna Arrangement same in Late Chief Comm Proposal 2006 of 27 Sept 1897.

under

(85)

that an enumeration may be made of all living trees in each mile, on either side of the road in the District; and that on receipt of this information, instructions may be issued in order to get the un-planted portions planted by the villagers. He further suggests that an inspection of the trees may be made every year during the early rain, i.e., about April and May, with a view to ascertain what plants are living, and to direct the replacing of those that might have decayed. He adds that Registers should be kept in every Taluk and, also in the

District office, giving the following information :—

(a) The number of trees in every mile of the road;

(b) The number of stumps planted during the year.

(c) The number that have decayed during the year;

(d) The number that have survived out of those planted during the year.

He is of opinion that the introduction of nurseries is not necessary, as in his District the country avenue trees consist almost entirely of the fig kind which thrive best from stumps about 7 ft long. He states that the fig kind, such as Atti, Goni, Basari Kca, possesses the following advantages

REVENUE BRANCH

OFFICE NOTE.

SUBJECT. Regarding road-side arboriculture.

LAST REFERENCE. Letter No. 700. dated 1895

from the Deputy Commissioner Bhandara District

Letter No. 1339 S. 9-2-1896 from the Offg Chief Secretary to the Chief Comr of Central Provinces to the Comrs and Dy Comrs, Central Provinces, forwarding copy of letter No. 3887-116 S 4 II Dec. 895 from the Comr of Settlements and Agriculture.

No. S 414-21 / R 3265 S. 14. 3. 1896.

In March 1896 [illegible] correspondence, as per margin, regarding the working of the arrangements for roadside arboriculture in the Central Provinces for the year 1895-96 was circulated to the Dy Comrs of Districts, who are also requested to submit their proposals, if

Success in Mysore, does not require any change. He observes that a good deal depends upon the energy and interest of the Amildar and that the duty of planting avenue trees is well understood by people.

(29)

Letter No. 1155/862 dt 11. 5. 1896

5. The Dy Comr of Shimoga points out that whereas roadside arboriculture is in a state of transition in the Central Provinces, it is an accomplished fact in Mysore and has been working very satisfactorily for the past many years. He says that the concession shown to persons planting avenue trees, under section 43 of the L. R. Code, and the grant of Inams for public

public topes form a sufficient impetus to cause the ryots to undertake the work, and that when new roads are opened the villagers themselves distribute the work of planting avenue trees, which is quietly managed by the Local Revenue Authorities. He is of opinion that the system of arboriculture obtaining in Mysore cannot be improved.

(30)

6 The Deputy Comr. of the Chitaldoorg Dt × states that no change in the system obtaining in Mysore is necessary, and that it is evident from the report circulated

× Letter No. 927/629 dd 17.5.18

the subject, for adoption in Mysore.

Their replies, which have been since received, run to the following effect:-

The Dy Comr, Kadur Dt, states that throughout his District all avenue trees are tended and kept up by private agency i.e. the Amildars get this done through the agency of the Patels of different villages through which the roads run. No record being kept of the number of trees living on the roads and the record regarding the planting of new in place of dead trees, being kept up in a very haphazard way. He suggests

Letter No 654 Dy 25 1895

That

advantages over other trees :—

(i) They grow more quickly than other trees and grow more easily in the Maidá

(ii) As they shed their leaves during the monsoon, they do not cause the constant drip which robs the road

and (iii) They yield a large quantity of fruit, on which cattle feed greedily and which consequently is a benefit to the villagers.

In places where the roads run a long distance from Amrit Mahal villages, it is time that it may be necessary to employ some agency for planting trees as the villagers may find it hard to plant such plantations, but he says that until such is proved to

States that through the influence
and inducement of the District
and Taluk officers, extensive
roadside avenues and groves
have come into existence in
that District, that the trees
are maintained and
improved by the planters
who in return are allowed
to take the fruit &c a thereof
and that no expense by
Govt is required nor any
other arrangements in the
matter called for, so far
as that District is concerned.
He adds that the planting of
fresh avenues, wherever
necessary, can also be

Secured

Secured under similar conditions, and further that the liberal provisions contained in rules published in App. G. to the L. R. Rules offer sufficient incentive for planting by private agency.

(3)

10. The Dy Comr, Bangalore District, × states that so far as the Mysore State is concerned, there is nothing new to be done in the formation of roadside avenues, inasmuch as the work, which has long been appreciated as a religious duty, is performed by Hindus and inasmuch as the popular feeling in

× Letter No 699 dd 8. 1. 1897

se the case, Govt agency need not be employed, specially because here is a condition in the Patels bound that he should look after the avenue trees.

4 The Dy Comr of Bassein observes that the system obtaining in Mysore, viz. of having the avenue trees planted by ryots who in return enjoy the fruit &c thereof, is far better than that obtaining in the Central Provinces, where a good deal of the work is done by Govt agency and expended, and states that the system which has worked with eminent

success

× Letter No 809 / Secy

circulated but marked
success in this respect
has only been the outcome
of the interest taken by
Tahsildars and that
class of officers, are to be
depended upon for the
enlistment of private
charity in the matter

Letter No 20 dt 10. 7. 1890.

7. The City Corp. of Trichi
× States that the existing rule
offering encouragement to
private persons for planting
topes and avenue trees
seem sufficient, that the
District has been lined
with avenue trees, that
the Jamabandi officers
are expected to inspect
them

them and report on their
condition, and that so
far as that District is
concerned, there is no
necessity for any special
establishment for the
maintenance of avenues.

8. The Collector of Coorg,
in his letter No. [illegible], states that the
system now adopted in Mysore
is what is recommended
by the Board of Settlement
and Agriculture, viz, the
encouragement of the said
culture by agriculturists,
and that consequently
no change in the system
in Mysore is called for.

9. The Collector of North Arcot states

× Letter No 121 Dt 21. 7. 1868

× Letter No $\frac{452}{115}$ Dt 15

in the matter is simila
within the last half a
century by the grant
fact and dignity accru
land for the upkeep
and in regard for su
enterprise. We go to
length of adducing tha
there are no roads in th
country not covered
generally with pavement
We suggest that as ther
is much vagueness a
diversity of practice re
garding the rights an
privileges of the expe
plant the revenues, do
definite rule may be
laid

laid down in that respect
with a little more liberality
which will be productive
of much good in the
matter. We are of opinion
that roadside arboriculture
should also include the
topes planted in every
village, which have been
much neglected of late,
but which, besides being
convenient to travellers,
are important as affecting
the climatic condition of
the tract concerned, and
which, for that reason,
deserve careful improvement
and support. We have

that

that the suggestion of the Chief Officer of Dan-
-gadee, to plant Sandal
trees between every two
avenue trees, will neither
be successful nor suited
to the purpose, as the
tracts through which
roads run are generally
too hard for the delicate
Sandal to grow, and as
the Sandal, which is a
slow growing and dragging
plant, will not be able
to comfort the traveller
with shade.

Submitted for orders

whether in avenues or groves,

Some steps might be taken in consultation with the Forest Conservator to train Taluk Peons or other available persons for the work, and if necessary, to obtain the services of instructors temporarily for the purpose, to such extent as the local funds of the districts might admit of.

In Conclusion, he observed that in the case of imperial lines under the immediate charge of the P.W.D, the work of pruning & lopping should be carried out by those officers with due regard to any private interests that might exist.

14. With reference to the above Progs., the Conservator of Forests proposed a set of rules for pruning and lopping avenue trees, which were approved of by the Chief Commr. and directed to be communicated to the Commrs

of Divisions, Deputy Commissioners.

(vide Progs No. 7903 × / Genl: 181 dd 21.1.76)

× vide (2) of Ref: See:-

15 In the Chief Commrs Progs No. 2606 dd 14 / Divs: 368 dd 2d Aug: 1880, it was directed that matters relating to the planting and watering of avenue trees, the removal of dead trees, and the disposal of the produce, should continue to be dealt with by the Revenue authorities, that the lopping of the trees and the removal of any obstructions to the road, should be carried out by the officers of the D.P.W or others in charge of the road, who should be responsible for these duties, & that the latter should bring to the notice of the Rev: officers any matters requiring their attention in connection with the avenue trees. In Conclusion, it was observed that by such co-operation on the part of the officers of both Departments, the proper planting

CIRCULAR LETTER No. 739.

FROM

R. H. CRADDOCK, Esq., I. C. S.,

Offg. Chief Secretary to the Chief Commissioner,

Central Provinces,

To

ALL COMMISSIONERS AND DEPUTY COMMISSIONERS,

Central Provinces.

Dated Nagpur, the 19*th February* 1896.

SIR,

I am directed to forward for your information copy of a letter No. 4887—116, dated the 4th December 1895, from the Commissioner of Settlements and Agriculture, to the Second Secretary to the Chief Commissioner, on the working of the arrangements for road-side arboriculture for the year 1894-95.

2. I am to remark that the delay in the submission of reports noticed by the Commissioner of Settlements and Agriculture in his opening paragraph is discreditable to the officers and public bodies concerned; and it is hoped that the carelessness shown in the compilation of the prescribed statements, which the Commissioner of Settlements and Agriculture complains of in his paragraph 8, will be avoided in future.

3. The period under notice is one of transition, and the arrangements have not worked so satisfactorily as could be wished. Far better results will be expected when the detailed arboricultural programmes have come into operation.

I have the honour to be,

Sir,

Your most obedient Servant,

R. H. CRADDOCK,

Offg. Chief Secretary.

COMMISSIONER OF SETTLEMENTS AND AGRICULTURE,

Central Provinces,

TO

THE SECOND SECRETARY TO THE CHIEF COMMISSIONER,

REVENUE DEPARTMENT,

Central Provinc

SUBJECT :-

Road-side Arboriculture, 1894-95.

Dated Nagpur, the 4th December 189

SIR,

I have the honour to submit the usual statements showing the resul of Road-side Arboriculture during the year 1894-95. Under Revenue Boo Circular III-39, dated the 6th December 1894, the responsibility for arbo cultural work on provincial roads was transferred to the Public Works Depar ment, and the submission of separate reports by Executive Engineers, throug the Chief Engineer, was prescribed. The date fixed for the submission of the returns is the 31st May, but there has been very great delay in their receip None of the Public Works Department reports were received before the mont of August, and the latest, the Sambalpur Report, came to hand on the 8t October. There has been similar delay in the submission of the reports du from District Councils through Deputy Commissioners and Commissioners Divisions, and the Jubbulpore Report was not received until the 18th Septembe Owing to these regrettable delays, the consolidation of the statements in m office has only just been completed. I trust that more punctuality will b observed in future, and that the submission of my review will not be similarl delayed in subsequent years.

2. The figures relating to the operations of the Public Works Departmer on provincial roads have been tabulated in separate statements. The expend ture on these roads is a charge against provincial revenues and must therefor be kept distinct from that incurred by Executive Engineers and Deputy Com missioners on behalf of District Councils on District Roads. The latter expend ture is met from the allotments fixed in appendix A to Revenue Book Circula III-39, part of which is contributed by Local Funds and part from Provincia Revenues.

3. I deal first with the operations of District Councils. The number o nurseries is 56 against 55 in the previous year. The orders relating to th restriction of the number of nurseries, embodied in Circular Letter No. 5363 dated the 3rd December 1894, were issued too late to make any impression o the figures of the year now under report. Nor is it possible in all cases fo immediate action to be taken in this direction, as existing trees have first to b disposed of. That the matter has engaged attention is clear from the distric reports as also from the various arboricultural schemes which have come befor

me recently. In several districts, however, such as Wardha and Bhandara, the number of nurseries has increased since last year, and under the scheme lately submitted from the latter district, it is contemplated to start nurseries at various points along the Pauni-Adyar Road, to which the Council propose to devote their efforts for the next year or two. The expediency of this action is not apparent, and the Council has been requested to reconsider its decision. In 1891-92 there were only 40 nurseries in the Provinces, and the cost of their maintenance was Rs. 1,451. The amount expended during the year under report was Rs. 1,921, and the excess of Rs. 470 odd could doubtless be more profitably spent. On the other hand, it is quite possible to go too far in the other direction, as the Balaghat report of the year shows but too clearly. In this district arboricultural operations have come to a practical standstill, as there are no saplings of sufficient size to transplant, and out of Rs. 300 allotted for arboriculture, only Rs. 59 has been spent. In Jubbulpore also the operations are hampered for want of saplings of the requisite growth.

Under ordinary circumstances it would appear that one or two nurseries should suffice for a district. Suitable sites should be selected with proper drainage and adequate facilities for watering during the hot months, and these nurseries should be permanently adhered to, and not shifted, except for good reasons. The system which appears to find favour in the Bhandara and other districts of establishing temporary nurseries wherever water may be available along roads on which operations are shortly to be undertaken, is not a desirable one, and has been condemned by the Administration. In the first place the seedlings take three or four years to reach that stage of growth when they can safely be transplanted, and by the time they are ready have cost a disproportionate sum of money. There is, moreover, no supervision of the road *malis*, and under such circumstances experience has shown that success cannot be anticipated. It would therefore seem necessary that the attention of District Councils should be invited again to the subject.

4. The number of trees planted during the year are compared with the corresponding figures of the two previous years:—

	1892-93.		1893-94.		1894-95.	
	By Government agency.	By private agency.	By Government agency.	By private agency.	By Government agency.	By private agency.
	No.	No.	No.	No.	No.	No.
Planted on road sides ...	8,292	7,063	8,156	17,863	5,105	30,181
Planted in groves ...	2,404	3,543	301	2,359	180	262
Total ...	10,696	10,606	8,057	20,222	5,285	30,443
GRAND TOTAL ...	21,302		29,179		35,728	

These figures appear to indicate a substantial progress, and the greater extent to which private agency has been utilised should *primâ facie* be accepted as a satisfactory feature. Of, however, the 30,443 trees planted by local agency, 17,960 are shown against Bilaspur and 2,350 in the Sambalpur Return. The system adopted in these districts is the simple one of employing a number of arboricultural peons, whose business it is to justify their existence by inducing agriculturists to plant and maintain trees. These duties of supervision have cost Rs. 189-13-4 in Bilaspur, and good work may possibly have been accomplished. But this mode of procedure is to my mind open to the most serious objections, and I have on this ground felt it incumbent on me to return the arboricultural scheme of the Bilaspur District, to the Deputy Commissioner, for reconsideration. Unless the arboricultural peon is very different from the peons of other Departments, and there is no reason to suppose that he will harrass the ryots less than his compeers, the result of this venture will probably be to disgust

the very people whom we wish to conciliate, and to retard the progress of arboricultural operations by private agency, which it is the object of the Administration to foster.

The Sambalpur figures are admittedly based on the returns of the peons, and a doubt is expressed as to their accuracy by the compiler of the report. Under these circumstances, as the same system prevails in both districts, it may perhaps be expedient to accept the Bilaspur statistics reservedly.

5. In some districts little or nothing has been accomplished by private agency, and the recent failures of crops have doubtless operated to render the enlistment of this agency more difficult than would otherwise have been the case. It is manifest, however, that where, as in the case of Chhindwara and Bhandara, the Tahsildars take a real and lively interest in the matter much progress can be counted upon. The efforts of the Tahsildar of Sausar have met with marked success this last year. In other districts, where the Tahsildars are apathetic—such as Seoni, Wardha and Nagpur, the results are most disappointing. A good example has been set by the Court of Wards, Hoshangabad, which has planted over 500 trees, and similar action is about to be taken in Narsinghpur. Much more might clearly be done in this direction in other districts with rich estates under management.

The Deputy Commissioner, Hoshangabad, alludes to an intention on his part to present *ad interim* certificates to those persons who have planted trees, but there is no mention of the subject in the Chhindwara and other reports. It is most important that certificates should be issued without delay to those persons who have earned them, and it is certainly expedient that the number of certificates and sanads granted annually should be stated in the District Reports, for the information of the Chief Commissioner.

6. The number of trees planted by Government agency has fallen from 10,696 in 1892-93 to 5,285 in 1894-95. In so far as this denotes a tendency to utilize private agency to a fuller extent, there is no ground for regret, but this is not the case in all districts. In Damoh, Seoni, Mandla, Wardha, Nagpur and Balaghat, the results are very poor, and an awakening of interest on the part of all concerned is desirable. The necessity of drawing up a scheme of operations, in accordance with recent orders, is attracting more attention to the subject of arboriculture, and I have during the course of my tours been pleased to come across several Extra-Assistant Commissioners and Members of District Councils who are devoting their energies to carrying out the wishes of the Administration.

7. As regards the maintenance of trees planted in the preceding year, fair success has been attained, with few exceptions. The results are worst in Saugor, where only 131 trees survived out of 513 planted. The damage is attributed by the District Council to hoar frost and a severe hot season, but the Deputy Commissioner assigns untimely transplantation as the cause, and he is probably right. In Nimar the percentage of casualties was also high, but this district is a specially dry one, and arboriculture is carried on under peculiar difficulties. The figures returned from the Wardha District are open to doubt, as not a single tree has perished. It is not always borne in mind that the efficacy of maintenance is gauged by considering the number of trees which survive out of those planted in the year immediately preceding, and not of the number planted in a series of preceding years. Neglect to observe this often vitiates the returns.

8. The allotments fixed by the Chief Commissioner for Road-side Arboriculture are entered in Appendix A to Revenue Book Circular III-39, the sums to be contributed by the District Council as also from Provincial Funds being separately shown. To judge from the various reports there is at present some confusion existing in regard to these allotments. In some cases the special grant from Provincial Funds is stated not to have been placed at the disposal of the Council by the Comptroller. In the Raipur Report it is alleged that the grant has been disallowed by the Administration.

In the statements received from the Nagpur District figures relating to tl operations on District and Provincial Roads have been mixed up, and t provincial allotment is stated to be that sum which has been spent by tl Public Works Department on arboricultural operations. The figures have be separated as far as possible in this office.

In the returns accompanying one report the total expenditure was arrive at by adding rupees to trees.

More care is necessary in compiling these simple statements, and the prov sions of Revenue Book Circular III-39 require more careful study than h hitherto been accorded.

9. The total expenditure of the year is Rs. 8,940-0-10, of which almo two-thirds has been spent on maintenance. The corresponding figure of la year was Rs. 12,086-1-0, which approached more closely to the amount san tioned by the Administration, *viz.*, Rs. 11,780. Many districts have not worke up to their allotment, but we are now in a transition state, and closer approx mation between the amount spent and allotted may be expected in future, wh a proper scheme has been drawn up, and each District Council has taken d account of its ways and means. From Damoh comes a complaint of insuf ciency of funds; but only Rs. 475-11-7 has been expended, out of Rs. 7(available.

10. The total receipts aggregate Rs. 5,399-13-0 as contrasted wi Rs. 4,046 in 1893-94 and Rs. 5,918 in 1892-93. The income has accru mainly from sale of fruit in Jubbulpore and Nagpur, and from the sale loppings and fellings in Narsinghpur, which district is described by its Depu Commissioner as specially arboreous and possessing finer avenues than mo others in the Provinces.

11. I turn now to the operations of the Public Works Department Provincial Roads. Every effort has been made to get the statements correct, b considerable misapprehensions in regard to the scope of the entries in the vario columns have arisen in this the first year of their submission. In some cases is not apparently understood that two separate reports are required fro Executive Engineers—

(i) one in regard to Provincial Roads, which is submitted to the Chi Engineer, and through him, comes on to this office;

(ii) the other relating to operations on District Roads Classes I and I which has to be forwarded to the Secretary, District Council, f incorporation in his District Report. If this matter be borne mind in future this office will be saved much trouble in tl examination and adjustment of the figures prior to consolidatio

12. The Public Works Department has kept up 12 nurseries, at a cost Rs. 505-10-5, and has planted out 4,338 new trees for an expenditure Rs. 1,357.

In maintenance the Department has been singularly unsuccessful, less th one-third of the total trees planted in the preceding year having survived. have not been favoured with any explanatory remarks designed to elucida these figures, and the cause of this singular circumstance is left to conjectu The results in the Nagpur District are unsatisfactory, where only 102 out of 3 trees have survived, and no less than Rs. 599 have been expended, but matte are worse in Raipur, where the Executive Engineer has managed to keep ali only 281 trees out of 2,232 planted. It would appear that more was attempt in the latter district than could possibly be effected with the resources at dispos At the rate of 352 trees to a mile, the 2,232 trees would represent the plantin out of six miles. Allowing one cooli at Rs. 5 per mensem, for each mile, t cost would be Rs. 180 in six months during which watering would probably required. This exceeds the actual amount expended on maintenance=Rs. 178-9. Supposing that water were obtainable at the most convenient place, *i. e.*, a nala somewhere on the mile to be irrigated, it would still be impossible for o

or under District Councils, in the Central Provinces, during the year ending the 31*st March* 1895.

(a) The whole amount was met from Local Funds.
(b) No expenditure debited against this allotment.
(c) The Comptroller has not yet placed this amount to the credit of the District Council.
(d) The expenditure was nearly covered by the receipts. It is not understood why the Provincial Grant was not received.
(e) Stated to be disallowed by the Administration.

man to keep alive 333 trees planted 10 yards apart on both sides of a road. The distance he would have to travel would be prohibitive, unless indeed the 'gharra' system of irrigation were adopted, which has been followed during the season under report with considerable success by the Deputy Commissioner of Raipur.

It has been laid down in the Circular instructions that more trees should not be planted in any year than the agency for their maintenance can look after. This principle cannot safely be ignored.

13. The total expenditure for the year is Rs. 4,996,—the bulk of which, *viz.*, Rs. 3,133, falls under the head of maintenance. The cost of maintenance per tree kept alive is approximately Rs. 2-12-0, which contrasts badly with the results obtained on District Roads,—the corresponding rate being only 11 annas.

I have the honour to be,

Sir,

Your most obedient Servant,

L. S. CAREY,

Commr. of Settlts. and Agriculture,

Central Provinces.

Secretariat Press, Nagpur:—E. D., 21-12-95—278

Sir

With reference to Government's
No. 5.1.4-24 dated 14 December asking
RP 3265
for suggestions regarding arboriculture on the road sides, I have the honour
to inform you that throughout this
district all avenue trees are planted
and kept up by private agency i.e.,
the Ryots getting done through the
agency of the Patels of the different villages
through which the main, sub. Divisional
there is no record kept of the number
of trees lining on any of these roads
and the acquiring of data are to keep
it in a very haphazard way.

I would therefore beg to suggest
that to begin with an enumeration be
made of all the living trees in each
side on either side of the head of all
roads in the District. On receipt of the

[illegible] [illegible] [illegible] [

[illegible] men, the advantage of the fig, such as the [illegible], and Russell, are that they are quicker growing than any other, come more easily in the Russian, and their leaves during the monsoon and by reading do not cause the excellent dairy which, with the said and give a large quantity of fruit to which cattle feed greedily and in consequence benefit the villagers.

In some places, where the roads run for any greater length of distance through Inuit Native land, it may be found necessary to employ government agency for the planting of these trees, as it may be found very hard for the villagers to do, but until such is proved to be the case I do not recommend the employment of government agency, more especially as there is a condition attached to the said

Kaiser District

Dated, Kaiser, 31st March 189

From

A. Krishnaswamy Ayyar Esq
Deputy Commissioner
Kaiser District

To,

The Secretary to the
Government of Mysore
General and Revenue Department
Bangalore

Sir,

In acknowledging the receipt
of your circular order No. 3414-21
Dated the 4th Instant, in re Rodent
Agriculture, I have the honor
to state that in the Central Provinces
a good deal of planting is done by
Government Agency and at Govern-
ment expense, Provincial and
District Funds.

2 ——— It is a well known fact
that

that a far better system obtains in Mysore. The whole of the Road side planting is done by Ryots of the neighbouring villages who enjoy the fruit, dead wood and Coppice of these trees. The system has worked with eminent success in Mysore and does not require to be changed. A great deal of course depends upon the energy and interest of the officials concerned. The duty of planting avenues on roads is well understood by the people

I have the honor to be,

Sir,

Your most obedient servant,

Sir,

With reference to Government Proceedings No 844-21 dated 4th March 1896 last together with the enclosed Circular from the Offg: Chief Commissioner of the Central Provinces, in regard to the roadside arboriculture (this day passed on to the Deputy Commissioner of Chitaldrug as directed), I have the honor to state that I have no proposals to make touching the scheme on the subject, which has been in satisfactorily working in the Mysore Province for the last many years. I have to observe that

While the scheme for roadside planting in the Central Provinces is in a state of transition, it is an accomplished fact in Mysore. The work there is in the hands of different departments attended with difficulty and great cost to Government, whereas in Mysore the system is simple and quite practicable. Under section 43 of the Land Revenue Code, the ryot who plants the avenue trees is allowed the concession of cutting the fruit of the trees, and the wood when the tree dies out. Planting avenues and topes is encouraged by Government as a charitable work and the concession referred to works as an incentive on the part of the villagers voluntarily to undertake this work. No sooner a new road is made than the villagers distribute amongst themselves the work of planting

Trincomalee, 5th July 1926.

To The Secretary to the Government of Ceylon, General and Revenue Departments.

Sir

In acknowledging the receipt of Government Proceedings No. 8474-21 / A 32-65 dated 4th March last, regarding roadside Arboriculture, I have the honor to state that the existing Rules (Appendix G, Rule No: 25 to the Land Revenue Rules) for the encouragement of the planting by private persons of Topes and Roadside avenues of trees seem sufficient. Most of the roads in the District have been lined with avenues of trees. The Jamabandi Officers are expected to inspect these trees and report on their condition. So far as this District is concerned, there is no necessity for any special establishment for the maintenance of roadside avenues.

(19)

To,

The Secretary to the Government
of Mysore,
Genl. & Rev. Departments,
Bangalore.

Sir,

With reference to Government Proceedings No. 5414-21 / R. 3265 dated 14th March 1
calling for proposals on the subject of
Road side Arboriculture, I have the
honor to state that so far as the Bangalore
District is concerned, there is nothing
new to be done in the formation
of Road side Avenues. The work has
long been appreciated as a religious
duty and performed by Hindus with more
or less fervour, as may be evidenced
by the stately and umbrageous avenue
and groves, with which the country
side is studded in all parts. The
popular feeling in the matter was
much stimulated within the last
half a Century by the grant of Poli
and Inferior assessed land, for the up-keep

of land in reward for such enterprize.

2. After the late Sir Frank Cubbon's time the alienation of land for the purpose was not much encouraged although fare instances of it were not wanting. On the other hand the energy of the local officers was enlisted in the work, supplemented occasionally by grants of money from the Public treasury. In this manner even the roads in the more arid tracts of the country have been lined with fine avenues, which are not only a pleasing feature in the landscape, but are also positively a boon to the weary way-farer. It may therefore be asserted without the fear of contradiction that there are no roads in the country not bordered generally with avenues.

3. The work was done by ryots within the limits of their respective villages. When new roads are formed their sides are also planted up in like manner.

4. It is however desirable to lay down some definite rules regarding the rights and privileges of the ryots who plant the avenues. There is at present much vagueness and diversity [illegible] is

sure to be productive of much good in the matter.

5. Casualties are not infrequent in the avenues; and they are filled up more or less expeditiously according to the pressure brought to bear on the ryots of the adjoining villages.

(124)

6. Road-side arboriculture ought also to include the topes planted some years ago in nearly every village. These have been, I regret to say, much neglected of late years. Besides the convenience of travellers, they are in my judgment important as affecting the climatic conditions of the tracts concerned and should be carefully improved and maintained.

7. The District Forest Officer of Bangalore suggests that sandal wood trees should be planted among the road side avenues between every two trees, by dibbling in sandal seed during the early rains. But I cannot say that this will succeed or will suit the object in view. For, the roads run in tracts which generally contain too hard a ground for such a delicate tree as the sandal. Besides, we want shady and quick-growing trees

with spreading and leafy branches for the benefit of travellers. Sandal is a slow growing scraggy plant, which takes several decades to mature, and put out any wood to speak of and which is not very useful to the traveller in the hot months.

R.T 116-92

(27)

The avenue trees especially after the turn from French Rocks to Melkote were recently found quite mutilated. The local negligence which permitted this act of destruction should be severely noticed. The trees along this road as well as along the Melkote-Krishnarajpete and Dandiganhalli-Hassan roads call for greater attention on the part of the Revenue officers concerned. There are many vacancies to be supplied along the road last mentioned.

2. The Deputy Commissioners of the Mysore and Hassan Districts are requested to at once issue needful instructions in the matter. In this connection the Dy Commrs are requested

to see that the Standing orders of Govt as regards the planting, pruning, and lopping of Avenue trees are strictly enforced, any want of attention being promptly and adequately noticed.

(234)

3. The Supt. Engineer, Western circle, considers it advisable that the duty of lopping avenue trees on the sides of public roads, should vest with the P. W. Department. The Supt. Engineer, Western circle, states that from what he has himself noticed when touring in the different divisions, he cannot help concluding that sympathetic attention is not at present being paid to avenue trees and that when anything is done, it is done spasmodically, that it is not at all unusual to see bare stumps projecting some feet from the trunk when branches have been cut, that branches are cut unnecessarily in many cases, also that sufficient attention is not paid to replanting

though repeatedly brought to the notice of the Revenue authorities.

We think that the maintenance of avenue trees, can best be looked after either by the Forest Department, if that Department has sufficient Establishment for constant supervision, or by the P.W. Department, which has charge of the roads.

4. It is clear from these reports that the Revenue Department has equally failed to properly attend to the duty of lopping avenue trees on the sides of public roads, entrusted to it in Govt. Res. (P.W.) No. 5391-610 dated 20-12-92 932-51

The early sanction of Government is therefore solicited to the recommendation made in the

1902

MYSORE P. W. DEPARTMENT.

SECRETARIAT OFFICE
Received 2897
14 JUN 1902
Mysore P. W. Dept.

No. 2627

From J. J. Whiteley Esquire M.I.C.E.
THE SUPERINTENDING ENGINEER,
Eastern Circle

To Colonel Dyne R.E. Camp Chief R.E.
Coorg Engineer of Mysore.

Dated 13th June 1902.

Despatched

Enclosure No. 4

Subject.

Submits a report on the result of Lopping Rubber trees by Revenue Department

Submitted to Govt. for orders
Send to the Division, with
reference to his orders on his
Circle note Endt 22nd May last
(Copy A), the enclosed two
abstracts of the results of
the Superintendent of
Eastern Circle, and the
covering letters of the Supdt.
Engineer -

(1) It is to be seen from
the abstract that the Supdt.
never advocated that in some
cases lopping of avenue trees
is not carried out at all,
to the exclusion of trees;
(2) in other places, it is
most carefully & systematically
attended to, & when done,
Mark is carried out by the
Resident, Mr Dewan is bound
to proceed on tour, the trees
are badly mutilated, (3) that
many some valuable trees are
lopped and for the sake of
wood, but since there is
scarcity of wood everywhere,
villagers do not care to
avenue trees, & (4) that when
they are known down by
wind storms even the
trees are not removed when
removal is greater than
one of the trees, & Govt
the revenue deduction

P.T.O.

MYSORE P. W. DEPARTMENT.
SUPDG. ENGINEER'S OFFICE.
Eastern Circle

No. 2627

13th June 1902

From

(238)

J. J. Whiteley Esquire M. I. C. E.
The Superintending Engineer,
Eastern Circle.

To

Colonel D. McNeil Campbell R. E.
Chief Engineer of Mysore.

Sir,

✓

Adverting to your no $\frac{350\,A}{1890}$ of 3-4-02, forwarding a copy of your note on the topping of Avenue Trees on sides of public roads with the Dewan's orders thereon and calling for a report on certain points raised by the Dewan, I have the honor to forward for information the marginally noted reports received from the several Executive Engineers in the Circle noting the results of the existing arrangement and to add that from what I have myself noticed when touring in the different Divisions I cannot help concluding that systematic attention is not at present being paid to Avenue Trees and that when anything is done, it is done spasmodically.

2. It is not at all unusual to see bare stumps projecting some feet from the tree where branches have been cut. Again, branches are cut unnecessarily in many cases. Then, there is not sufficient attention, I think, paid to replanting. This is being repeatedly brought to the notice of the Revenue Authorities.

3. If the Avenues are to be maintained (and it seems

(2)

to Traffic, & correspondence between Depts, seeking in the obstruction being removed, in most cases by the officers who have charge of the roads = Sir Engr. are unanimous [illegible] that there [illegible] no improvement in this matter -

= The Engr. Engr. N. C. considers it undesirable that the duty of lopping trees on the sides of public roads should rest with the P.W. Dept -

The Engr. Engr., E. C. states that from what he has known of matters in towns in the Northern Dist. he cannot help concluding that systematic attention is not at present bestowed to avenue trees, & that when anything is done, it is done shamefully, that it would be well if the Forest Dept were to take charge of the trees from the trunk, & branches have been cut, that branches are cut unnecessarily in many cases, also that more attention is not to re-planting, though repeatedly brought to notice by Revenue Authorities - He thinks that the maintenance of avenues could best be looked after by

by

(3)

by the Forest Dept, if that Dept has staff sufficient for constant supervision, or by the P.W. Dept, which has charge of the roads.

= It is clear from the reports that the Rev. Dept has generally failed to have duty attended to the duty of lopping avenue trees on the sides of public roads, referred to at in Govt Pro. 2nd. 559 - 610 of 20th Jan 1902, 932-51 (vide B) - The only remedy of Govt is Mysore would be to the recommendation made in the concluding para of Rev Circle Note of 22nd Jan/02 (vide A), for reversion to the old arrangement, therein referred to.

I shall be glad to be favoured with the opinions of the Conservator on this matter — The inform in question with a great deal of what has been stated. The principal fault that has come to my notice is that avenue trees are more often utilized to fulfil many of the stock offers for the supply of fuel — Several trees were found quite mutilated — The PW Subordinates have no such motive to destroy the trees. It is undoubted that avenue trees require greater attention than is at present bestowed thereon.

for Sanction.

—o—

With reference to your letter on the office note dated 5-7-02, I submit the enclosed two statements of replies sent by the Executive Engineers of Eastern and Western circles, together with the covering letter of the Supdt. Engineer as regards the lopping operations at present carried on by the Revenue department.

2. It will be seen from the statements that the Executive Engineers report (1) that in some places the lopping of avenue trees is not carried out at all, (2) that in certain selections of traffic, (3) that in some places, it is not regularly & systematically

attended to, & when done which is generally when the Resident, the Revenue & the high official, is about to proceed on tour, the trees are badly mutilated, (3) that near some village, trees are promiscuously cut for the sake of fire wood, but where there is abundance of wood procurable, the villagers don't care to lop the avenue trees, (4) that when trees are blown down by storms and across the roads, they are not removed when the cost of removal is greater than the value of the trees, & there is therefore considerable delay & traffic, and consequent loss to dependants to ensue in the direction being removed in most cases by the P.W. officers who have charge of the roads. The Executive Engineers are unanimously of opinion that there has been no improvement in the matter.

Consolidated Statement of Replies received from the Executive Engineers of Cuddapah regarding the topping of Avenue trees on the sides of Cart Roads.

Division	No	Date.	Replies from Executive Engineers.
Bangalore Dn	3026/373	8th June 1902.	Reports that in the Taluk of Nagamangala of Pachapatna, the Nelamangala road was once important road viz Bangalore-Nandidrug, Bangalore-Belur, Hulee-Tumkur, Bangalore-Kadigenhalli, Bangalore-Venkatapura road. Trees not been planted. The more recent of minor roads are Planted about with a very few exception. In the Channapatna & Kankanhalli Taluks, the Dy. Conservator reports that the avenue trees of these Roads not been topped only any of the roads. In the Ramanagudda Taluk, the topping has been done unsatisfactorily. viz. in some roads trees are topped in a few miles only leaving a few yards to obstruct the traffic. In the Magadi Taluk beyond Jurisdiction topping between Gudemaranhalli & Magadi, only has been done along the other roads proper measures is needed. In the Anekal Taluk of Kolar Dist, the Sub. Dy. Officer reports that no topping is being done systematically. Of the Branches have been cut now and then but a good deal remains to be cleared. On the whole, it is apparent that topping of trees is not attempted periodically and as trees shoot forth their branches obstructing the road.
Kolar Dn	282	9th May 1902.	Reports that in his inspection during the last 4 months branches of Avenue trees were found overhanging so low as to interfere with the traffic which was especially noticed with the Bangalore-Kadapa, Mulbagal-Gowribidanur, Madanapalli-Kolar-Bombay, & Mulbagal Railway Feeder roads. Topping of branches have been done in certain portions of roads, but not properly generally. On the Kadappa road Railway Feeder & Mulbagal Gowribidanur

			to [illegible] they were safely tracked leaving here [illegible] Thursday the 16th inst at [illegible] Bridge so not being attended to did not [illegible] the [illegible] Bridge at present, in fact done so, very carefully as all [illegible] have been paid to among the surrounding [illegible] are not [illegible] [illegible] this will due to want of proper [illegible] of any [illegible] [illegible] & the A.P.W. Superintending Engineer

Statement of replies received from the Executive Engineers of Western Circle regarding the lopping of Avenue Trees on Sides of Public roads.

Division	No:	Date	Replies from Executive Engineers
Mysore	150	12-4-02	The Executive Engineer reports that systematic lopping of branches of trees obstructing traffic is not done. Since the advent of the Plague reckless mutilation of Avenue Trees is observed to be done by the Villagers to build their Sheds when Camping out.
Nanjanagud	179	19-4-02	Executive Engineer reports that he rejoined the General branch of the P.W.D. in October 1901. Since then he had opportunities of noticing a great deal of activity in lopping the branches of Avenue trees especially in connection with the recent provincial tour of H.H. the Maharajah in the Hassan division. A great deal of clearing had to be done for the occasion and it was done right loyally but the trees were very much disfigured. 2. Owing to Plague, road side villages have to be evacuated and Sheds put up in the fields the branches of Avenue Trees are freely lopped for use in the Construction of these Sheds; much to the disfigurement of the Avenue Trees. 3. Owing to Storms Avenue Trees are blown down and thrown across the roads, no attempt is made to remove the obstructions when the Cost of removal is greater than the values of the trees. The consequence is impediment to traffic; Correspondence between Departments ending in work being done by P.W.D. in most cases. 4. The Executive Engineer's experience in regard to the question is that the

requirements of the Safety and Convenience of traffic.

Shimoga	244	26-4-02	The Executive Engineer reports that the work of lopping of branches not regularly and systematically attended to; even it may be said that it is almost neglected. But when intimation of high provincial officers touring, is received, the work is then carried on and many branches not interfering with traffic are indiscriminately and mercilessly cut down. This is what the Executive Engineer has noticed in this and Chitaldroog division also.

Bangalore
12th May 1902

Captain R.E.
Superintending Engineer
Western Circle

			is not regularly and systematically attended to, and when it is attended to on special occasions, it is over done and in the case of instant removal of block to traffic, the present system is not effective.
Nabban	179	11-4-02	The Executive Engineer reports that under the present arrangements, the Avenue Trees are either totally neglected in re to lopping or badly mutilated as noted by the Dewan. The latter is in a measure a consequence of the former. After years of neglect, when the Amildar finds that H.H. the Raja or the Honorable the President of the Dewan is about to tour through his taluk he issues an order to the Shekdar and he to the Patail to lop Avenue Trees. A matter of them has the time then to devote any personal attention to the work. The result is mutilation, not only through ignorance of the rules for lopping but because the village officials think it a good opportunity to help themselves to some fuel or poles. This was pointed out to the late Dewan Private Secretary by the undersigned on the Kanakoday Road before the Executive the Viceroy's trip to Kakankote in November 1900. He has also complained of it repeatedly to Deputy Commissioners.
Radur	147	29-4-02	Executive Engineer States that there has been no improvement in attention to the lopping of Avenue Trees by the Revenue Department and when lopping is done in Maidan Taluks near the villages the trees are promiscuously mutilated for the sake of using them for firewood. In Malnad tracts it is scarcely done. In fact it is not found possible to enforce the ordinary lopping of Avenue Trees owing to remoteness of villages and paucity of inhabitants, besides the villagers care very little to lop the Avenues for the sake of firewood owing to abundance of wood procurable there. 2. The Executive Engineer is of opinion that the work is not regularly attended to, and no discretion used to restrict the operations to the absolute

Serial No 380

Note dated the 26th June 1902 by the Secretary to the Govt of Ellpore P.W.D. recommending that as the duty of looking avenue trees which was transferred to the Rev: Department by Govt Order No 5591-61C dated 932-51 the 9th December 1892, has not been properly attended to by that deptt, it may be re-transferred to the P.W. Deptt

No R 1370-9 of 30/9/02
R.7116-92

Prop why Secy
on 3/10/02

Order thereon

It has been brought to the notice of Govt that in some places the cutting of avenue trees is not carried out at all to the serious obstruction of traffic, while in others it is not regularly and systematically attended to, as branches are, in many cases, unnecessarily felled and bare stumps left

frequency. Just from the trunk after the branches are lopped off; that in some localities trees are profusely felled for the sale of firewood but where there is abundance of wood procurable, the villagers do not care to lop the trees; that when trees are blown down by storm, they are long allowed to remain where they fall, ~~and removed thereby~~ causing obstruction to traffic; and that sufficient attention is also not paid to re-filanting. It is therefore proposed that the lopping of trees and the removal of obstruction to the roads may be carried out by the Deptt. of Public Works, the Rev. Department being left to deal with matters connected with the filanting and weakening of trees, removal of dead trees and the disposal of produce.

Govt observe that in the deputy Comm^rs alone that, under Section 43 of

the Land Rev. Code, is compe-
tent to order the opening
of road - Side trees by whom
soever planted and reared,
and in whomsoever vests
the right to the land on
which they stand. It is
understood that the owners
trees, whether on Provincial
roads or on Local Fund Roa
have for the most part bee
planted by the Depts. In
any case, the transfer pro
posed necessitates a change
of law the need for which
has, in the opinion of Gov
not been conclusively est
blished. If so it has been
regarded, the Officers of the
Rev. Dept. have, in the past, been neg
lectful of their duty in
this important matter,
the remedy lies in insisting
upon a strict compliance
by them with the existing
orders on the subject, and
not in a radical change
by legislation, of a practice
which has long been in vogue

3. For these reasons, the attention of the Deputy Commissioners will be called to the several shortcomings noticed above, with a request that the matter may receive systematic attention. The following instructions are also issued for guidance.

4. The [redacted] lopping should be attended to every year at the close of the cold season, i.e. in the month of February, as it is considered to be the most convenient time for such purpose without any danger to the trees. In the following month, the rising temperature brings a number of trees into active growth and it would be fatal to lop them [illegible] do them irreparable damage if they are lopped.

5. The re-planting of trees in lieu of those destroyed by natural causes should be systematically enforced by Local Rev: Officers. Every

Sheldar Should be made
to inspect the places with
-in his jurisdiction, and
report to the Huzoor
just before the beginning of the
Rainy season how many require to
be planted; and the
vacancies
~~Vacant places~~ Should be
supplied by the Mukeeas within
~~regularly planted.~~
whose limits they stand.

6. At the Janiabandi
Talookdars Shewing the number newly plan-
ted in each Mukee
~~limits of our plantings~~
Should be obtained, and
~~authentic by the Jamma~~
~~bandi officer in his~~
~~report~~, a fair proportion
Should be
~~them~~ verified by in-
-spection by Taluk and
District officers. The
information to obtained as required for the
mentioned in the
Annual Jamabandi
Reports.

7. Such trees as shou
-ld in the neighbour-
-hood of the locality,
and as far as possible use
-ful fruit or other trees
Should be chosen for
planting in each place

Order
from 9/83
29/9/83

Proceedings of the Government of His Highness the Maharaja of Mysore, Revenue, dated 30th September 1902.

READ—

Correspondence ending with Note dated the 26th June 1902, by the Secretary to t Government of Mysore, Public Works Department, recommending that as the duty of loppi avenue trees, which was transferred to the Revenue Department by Government Ord No. 5591-610—932-51, dated 20th December 1892, has not been properly attended to by th Department, it may be re-transferred to the Public Works Department.

No. R. 1370-9—R. F. 116-92, DATED BANGALORE, 30TH SEPTEMBER 1902.

ORDER THEREON.—It has been brought to the notice of Government that in son places the lopping of avenue trees is not carried out at all to the serious obstructi of traffic, while in others it is not regularly and systematically attended to, branches are, in many cases, unnecessarily felled and bare stumps left projecti some feet from the trunk after the branches are lopped off; that in some localitie trees are profusely felled for the sake of firewood, but where there is abundance wood procurable, the villagers do not care to lop the trees; that when trees are blow down by storm, they are long allowed to remain where they fall, causing obstructi to traffic; and that sufficient attention is also not paid to re-planting. It is ther fore proposed that lopping of trees and the removal of obstruction to the roads ma be carried out by the Department of Public Works, the Revenue Department bein left to deal with matters connected with the planting and watering of trees, remov of dead trees and the disposal of produce.

2. Government observe that it is the Deputy Commissioner alone, that und Section 43 of the Land Revenue Code, is competent to order the lopping of road-si trees by whomsoever planted and reared, and in whomsoever vests the right to tl land on which they stand. It is understood that the avenue trees, whether c Provincial roads or on Local Fund roads, have for the most part been planted by tl raiyats. In any case, the transfer proposed necessitates a change of law, the nec for which has, in the opinion of Government, not been conclusively established. I as has been reported, the officers of the Revenue Department have, in the past, bee neglectful of their duty in this important matter, the remedy lies in insisting upon strict compliance by them with the existing orders on the subject, and not in a rad cal change by legislation of a practice which has long been in vogue.

3. For these reasons, the attention of the Deputy Commissioners will be calle to the several shortcomings noticed above, with a request that the matter may receiv systematic attention. The following instructions are also issued for guidance.

4. The lopping should be attended to every year at the close of the cold seaso *i. e*, in the month of February, as it is considered to be the most convenient time f such purpose without any danger to the trees. In the following month, the risin temperature brings a number of trees into active growth and it would do the irreparable damage if they are lopped.

5. The re-planting of trees in lieu of those destroyed by natural caus should be systematically enforced by local Revenue Officers. Every Shekdar shoul be made to inspect the places within his jurisdiction and report to the Amildar ju before the beginning of the rainy season how many require to be planted; and tl vacancies should be supplied by the villagers within whose limits they stand.

6. At the Jamabandi, statements showing the number newly planted in eac village should be obtained and a fair proportion should be verified by inspection b Taluk and District Officers. The information so obtained and verified should b mentioned in the annual Jamabandi reports.

7. Such trees as grow well in the neighbourhood of the locality and as far a possible useful fruit or other trees should be chosen for planting in each place.

H. V. NANJUNDAYYA,
Secy. to Govt., Gen. & Rev. Depts.

To—The Chief Engineer and Secretary to Government, Public Works Department.
The Deputy Commissioners of Districts.
The Revenue Commissioner in Mysore.

Exd.—J.T.R.

1902-03
